What's New in the Elektronika Live?

Elektronika Live is the most user friendly visual performance software available. It is designed for live visual performance enthusiasts and is absolutely free. If you perform in any medium or type of show including corporate events, clubs, theaters, clubs, festivals, weddings, parties, musical performances, plays, performance art, musicals, athletic events, fashion shows and much more, then Elektronika Live will help you create original and unique visuals that are unprecedented in both quality and complexity. Elektronika Live allows its users to design their own visuals in a matter of minutes. Elektronika Live is the intuitive VJ software for visual performers. This powerful, modular software will have you designing live visuals for your performances within minutes. Create your own live video compositions using your Windows PC. Just plug together modules from the list of over 30. Elektronika Live is also a midi video station, designed for the needs of live audio/video performers. Comes with full network support for using multiple, source computers and is the only VJ software to include a web server for delivering live web content at venues. What makes this video production software unique? Elektronika Live is designed for non-technical performers, but also for technical artists as well. You can use it as a midi editor, with a series of standard modules, or, for more complex scenarios, you can design your own modules. These modules may be things like a sampler, sequencer, effects and much more. These modules will be loaded on your computer from the software's online library and a module can contain one, many or all of these elements. You can also import modules from Elektronika Live's online library, containing thousands of others modules. Elektronika Live comes with over 30 modules, but there are hundreds more in the online library. Each module contains a list of features and each module can be programmed in several ways. The most powerful part of this software is its online library, allowing you to get the functionality you need, regardless of your computer hardware or software. It is fully compatible with Windows XP, Vista, 7, 8, and Mac. Elektronika Live can also be used as a midi video station. The software will automatically sync your visual design with your midi performance. The online library also has a full integration with the Elektronika Live VJ Software. Just choose one of the many modules that Elektronika Live can import from the online library, and the module will be synchronized with your performance. Finally, Elektronika Live comes with a powerful and very flexible visual performance system and plugin interface. When used with Elektronika Live VJ, this interface allows artists to navigate and manipulate graphics and video in real time. The program allows you to load

System Requirements:

Please use Chrome for your best experience. PS4/Xbox One PC Not Supported Laptop or other PC Devices may also experience issues or glitches with the game. Please play on Medium Settings, but lower the Texture, FPS, and Resolution. A PS4 Pro Version is also in development We will be releasing a full version update by end of June. ===== BATTLE FEVER - A 3rd person action shooter game in development =====
